

CLOUD COMPUTING DAY-1 QUESTIONS

ZOHO APP

2). Create a simple cloud software application for Flight

Reservation System using any Cloud Service

Provider to demonstrate SaaS

AIM:To prepare an application of flight reservation system

1. To login into app or sign up before booking the ticket or to open the environment.

The screenshot displays the Zoho Creator interface for a 'Flight Booking User Details' form. The top navigation bar includes a menu icon, the title 'Flight Booking User Details', a dropdown arrow, and a plus sign for adding new elements. The form is organized into two main sections: 'Basic Fields' on the left and a list of input fields on the right.

Basic Fields Section:

- Name:** Represented by a person icon.
- Email:** Represented by an envelope icon.
- Address:** Represented by a location pin icon.
- Phone:** Represented by a telephone handset icon.
- Single Line:** Represented by a document icon with a single line.
- Multi Line:** Represented by a document icon with multiple lines.
- Number:** Represented by the number '123'.
- Date:** Represented by a calendar icon showing '15'.
- Time:** Represented by a clock icon.
- Dropdown:** Represented by a dropdown arrow icon.

Input Fields Section:

- User_Email:** A text input field with an envelope icon and a red asterisk indicating a required field.
- Contact_Number:** A text input field with a telephone handset icon and a red asterisk.
- OTP:** A text input field with '123' and a red asterisk.
- Address:** A text input field with a location pin icon and a red asterisk.
- Age:** A text input field with a person icon and a red asterisk.
- Drop Down:** A dropdown menu with a dropdown arrow icon.
- Notifications:** A checkbox input field with a checkmark icon and a red asterisk.

The bottom of the interface features a footer with a 'Chats' icon, a 'Contacts' icon, a message 'Here is your Smart Chat (Ctrl+Space)', and a 'Trial expires in 15 days' notification.
